

An Oceans 8 Film, Written and Directed by Jon Bowermaster and Narrated by Mark Ruffalo.

The film takes a cross-country look at drilling, highlighting its variety of **contaminations**, the stories of its **victims**, the **false promise** of an economic boom, with a **focus on clean energy solutions** that would allow us to proceed towards a future that does not rely on yet another dirty fossil fuel extraction process. Interviews with scientists, health professionals, geologists and whistle-blowers provide the core information we think will convince the current President and those that will follow to join the “anti-drilling” majority growing across the United States and call for fossil fuels to be left in the ground.

When: MON MARCH 28, 2016 – 7:00 PM

Where: Pittsburgh Theological Seminary
616 N Highland Ave, Pittsburgh, PA 15206

Cosponsored by Thomas Merton Center, Marcellus Outreach Butler, Pittsburgh Theological Seminary Continuing Education Program, Food & Water Watch, and Clean Water Action
